# **Executive Summary**

**The rapid growth of blockchain since the latter half of 2010 has been a source of immense inspiration for people worldwide. The fact that the blockchain industry is in the early years of its development, the market has seen some groundbreaking outcomes from the cryptocurrency trends. Even with some intense backlashing on the crowdfunding platforms by the traditional market, the Acknowledgement of cryptocurrency by the public has become a great breakthrough for the crypto investors.**

**It is undeniably true, that we are a part of a digital era. There has been a dramatic change in the way we process information and communicate from the past few decades. It is only natural, that we now seek to revolutionize the way we conduct our daily activities. The cryptography has been successful to provide such platforms which are helping us to make our world a better place; by strengthening the e-commerce businesses, reducing the risk of scam, hacks and frauds in international transactions, improving money-transfer process, and by providing full authority, security and privacy to the masses of their digital wealth.**

# SHIBAFAME | Mission Statement

**Shiba Fame (India ka Bitcoin) is determined to revolutionize the dynamics of blockchain technology. The company is well-versed in its goal of simplifying the much densely formulated code of conduct in the legislative focused world.**

# **SHIBAFAME | Ideology**

**Shiba fame thinks change has its own force. Blockchain has opened the doors of changing the world with Decentralization and showed new world to traditional markets. We, in years of progression see ourself in top-notch projects, which will become the source of helping individuals who have the capability to do something and make a positive impact in the world, but lack funding.**

**The main Ideology of SFv2 is to educate every person about Blockchain because we, think Blockchain is so much more than Crypto Currency. It has the power to change the world completely; everything can be decentralized, which will unlock the new world. Nearly 70% of the India's population lives in rural areas; that is the main reason why Shiba Fame is looking forward to normalize the use of Blockchain in Rural areas of India such as Shravasti, Bahraich, Balrampur, kutch, Chettinad and many more, educate them about blockchain industries so they can contribute in India's economy & unlock the new Digital India.**

# SHIBAFAME | Use Cases

**Education Regarding Blockchain:** Blockchain is gaining a rapid growth of 150% to 300% every year since 2020. Consideration of this growth. In Phase #1 As a Project, our Aim is to educate about Blockchain to upcoming generation A.K.A. youth of country India, specially, in rural areas. Youtube , Telegram , Twitter and Discord types of free social media will be used to reach the youth .

**EASY AVAILABILITY OF MONEY:**

**SHIBAFAME will provide easy money any time 24/7 specially in rural areas. Shiba Fame can be use in emergency in term of medical purpose or any other emergency. Over 10 shop already testing SHIBAFAMEV2 as payment method in they villages.**

**NATIVE NFT COLLECTION:**

**Native NFT (Non-Fungible Tokens) collection, there will be 2000 SHIBAFAME Native NFT which can be staked later and reward will be in SHIBAFAME , this will generate passive income for individuals in rural areas as well give them access to exclusive Web3 App Development material and more ...**

**Percentage of the Fess from the NFT Market App will be use to burn SFV2 as well . Thus helping SFV2 price to rise and creating demand**

# **Adoption of Blockchain In INDIA**

**From a private sector viewpoint, various companies are exploring blockchain to improve effectiveness, and are trying to internally revisit their processes and workflows to add value to their service delivery systems. 56% of Indian businesses are moving towards blockchain technology, making it a part of their core business. The National Informatics Center has established a Center of Excellence (CoE) in Blockchain Technology, which operates as a coordinated, interoperable blockchain ecosystem around the nation. This allows the government to test-run projects before rolling them out for public interfaces.**

**As per a report by digital asset exchange Cross Tower and US-India Strategic Par Partnership Forum, blockchain technology, and Web 3.0 innovations will propel the digital asset economy's value from \$5 Billion in 2021 to \$262 Billion over an 11-year period, resulting in a \$1.1 Trillion contribution to India's GDP. Such is the impact of blockchain technology! Blockchain has remarkable growth potential for India.**

# Road Map 2023

# Future Development

**Cryptocurrencies are the future of our economy; they show a real advantage when the value and backing power of fiat currencies completely break down. The communities that find themselves in the day to day struggles of being unprivileged or recovering from conflicts can greatly benefit from a rapidly deployed network of nodes powered by aid organizations. The blockchain can be extended to such communities by using low powered devices that will utilize solar power and can help establish their vital food and resources supply line. The community regeneration and mobilization effort via the blockchain revolution can be at the forefront in bringing the unbanked and the underbanked to the digital economy and in securing microfinance loans and project funding to stimulate their growth.**

# Coin Information

Hyper Deflationary Token is the solution for inflation and SHIBAFAME Token looks to solve this issue with its Hyper-buyback and Burn cycle. Buying the circulation supply and burning tokens every quarter. The supply of coins will decrease over time instead of increasing. This means the value of each coin will rise if demand remains consistent.

# **Blockchain Technology**

**When we say that the world has become a global village, it literally has. With the help of technology and the Internet, communities are privileged to engage in active communication with people around the world. Time and space compression has potentially eliminated any consideration for boundaries; we can now communicate, exchange information, indulge in ecommerce, promote businesses, and literally sneak into other people's lives with the help of the Internet. Technology has become so widespread, that, according to world internet statistics, there has been a remarkable growth of 1,052% in Internet usage from year 2000 to 2018, globally.**

**The 21st century can also be called the age of digital sciences. We are currently living in a time, where science has made the impossible, possible. The advent of Sophia the Robot and the human experience of virtual reality are potential breakthroughs in the field of digital transformation. Due to rapid development of technology, the researchers and the scientists are now looking forward to opportunities to digitalize our lifestyle activities.**
